

TARPS

All Weather - ClimaTarp

The ClimaCover Tarp is built to last. Unlike other disposable tarps it appeals to those who have ongoing or periodical need for a durable, reusable tarp. We make our ClimaTarps from 10-ounce reinforced poly fabric that is UV coated for long life. Tarps are offered in burgundy, tan and gray as standard and may be custom color ordered with minimum limitations. Camouflage and interstate orange are available for custom orders.

The standard production sizes are 10 feet by 13 feet, 16' by 20' and 20' by 30'. Each size sets up in a multitude of configurations for different uses.

Heat welded edges, heavy-duty welt chord with nylon grommets spaced every 12 inches.

We can customize programs to your organization

Product and size mix will be influenced by geographic regions. Each program will require customization in order to best fit individual distribution systems, product mix and quantity requirements. Pallets can be drop-shipped to your regional distribution centers or individual outlets.

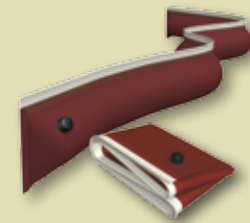

We are open to customized programs: Private label packaging; Containerized programs; Letters of credit programs; Volume rebate programs; Early order discount programs.

Contact the director of sales for special quotes and pricing. Inquire about your specific needs – we will work with you to meet those needs and to exceed even your highest expectations

AN ENTIRELY NEW LINE OF MERCHANDISE AND PROFIT OPPORTUNITIES

ClimaCover products are designed to work as a complete system or independently for a wide range of intuitive uses.

- Broad appeals to a variety of markets.
- Designed and packaged for self-selling, high-turn velocity.
- Delivering lucrative margins for one or 2 step distribution systems.
- We offer product demonstrations, installation instructions and sales training support.

Products are designed to save time and labor no matter if the user is a construction contractor, municipal engineer or a homeowner. All are engineered and produced for long-life, heavy duty performance. Easily and quickly deployed for a myriad of uses and designed for convenient storage and reuse. Slightly higher pricing is quickly amortized over the life cycle of the product.

ClimaCover products carry a limited warranty and are approved, certified and sanctioned by numerous agencies and organizations. We have obtained documentation from the DOE; WA & OR DOT; WA Department of Labor and Industries; BMP guidelines; CCR Cage code 4SZA4 GSA and the City of Tacoma Water and Utilities.

Specifications:

Ground Bladders - Tubular water-fill Ground Bladders are produced from 22-ounce, poly fabric with rugged UV coating. Industrial and commercial bladders have a chemical resistant additive that performs in hostile hazmat conditions. ClimaCover bladders are fitted with a 1.5" inside diameter fill port and a high pressure drain port, lined with 1" pipe threads. They also are made with through eyes for securing with spikes or ropes. Bladders are offered in interstate orange for safety and visibility or in standard gray.

Tarp & Awning Hanging Anchors - These tough water-fill Anchors are also made of the same high strength materials as the tarps and are available only in

18-ounce weight. Anchors are fitted with a 1.5" inside diameter fill port. They are available for outdoors and residential use in burgundy, tan, gray (or custom colors) and are fitted with a heavy kedered edge for easy attachment to awning slots and other materials.

Clips - We offer three different clips - all injection molded from a special formula (UB-XL420) of high-strength, plastic compound that is proprietary to ClimaCover. All are dead load weight tested for maximum holding power to any covering material.

Tarps - ClimaCover standard tarps are made from 10-ounce, wound-strand reinforced, poly fabric with a 3-mil UV coating. Hems on the tarps are heat welded for quadruple strength. Rugged nylon grommets are RF heat-welded on two edges at 12 inch intervals.

Commercial and industrial tarps (with pockets) are made from 10-ounce poly fabric with a chemical resistant additive to the rugged UV coating.

- Woodpile covers

TUBULAR / WATER-FILL BLADDERS & ANCHORS

Water fill Ground Bladder
Available in; Interstate Orange or Standard Gray

Commercial / Industrial Ground Bladder

Rugged, heavy duty, long-life water-fill tubes come in 10, 15 and 20 foot lengths. When filled to capacity they measure 8 inches in diameter and a 20 foot bladder weighs about 240 lbs.

Choose from standard gray or interstate orange which offers high visibility for increased safety. Secure erosion control coverings in far less time than the traditional sand bag method and without the risk of carrying heavy sand bags on slippery slopes.

Installs with smaller crews - Saves time and labor costs. Removal is fast and easy and eliminates any need for material disposal.

Chemical resistant coatings are available for HazMat operations. Scrubs clean for easy storage and redeployment.

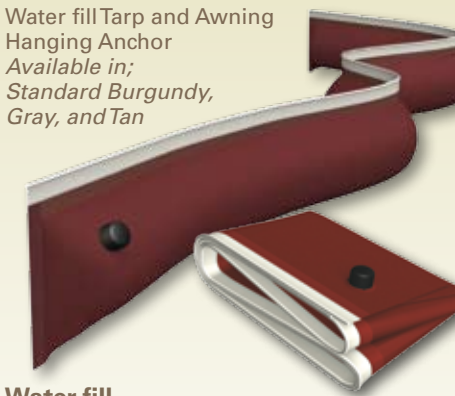

HazMat Spoil Pile Cover

Water Diversion while Flushing Water-Line

Water fill Tarp and Awning Hanging Anchor
Available in; Standard Burgundy, Gray, and Tan

Water-fill Tarp & Awning Hanging Anchors

This Anchor version is used for most applications (see applications listed at left). It is available in 6, 8, 10 and 12 foot lengths. It features a durable nylon corded (keetered) edge for ready use as an awning anchor. It also accepts a variety of connecting clips for easy attachment to most standard tarps. Anchors are attractively packaged with eye-catching graphics and motivating message.

CLIPS

Universal JAWS Clip

ClimaCover's patent pending JAWS clip features Cam-Lock Clamping and a unique, square tooth pattern that delivers 3X the holding power of other clips. Injection molded from our own high strength plastic compound and dead load tested. Jaws clips are designed for one-handed installation to grip onto any grommet-less covering material ranging from visquene to canvas. Various covering materials will tear at different load levels. Pulling force performance tests have proven that most materials fail (tear out) before our clip fails.

One handed application... JAWS CLIP™ with typical rope or cord tie-down.

Jaws Clip Shows Superior Gripping Power (shown here w/ visquene)

Self-Merchandising Packaging

4 - Pack Clam Shell for peg board display

ClipStrip 18 - count for impulse buyers

Bulk Box 70 - count with self-dispensing tray

Hook Clip

This clip is also made of the same high-strength, proprietary plastic compound for integrated use with our Tarp products. The clip's "Open Track" slides onto the keeder of our water-fill Hanging Anchor then clips into the grommets of any Tarp.

RV Awning Slide Clip

This clip offers the same high-strength quality production and materials as all of the other ClimaCover clips. The clip's "Open Track" slides onto the keeder of our water-fill Hanging Anchor then slips into the screen room track on the retractable awning to secure against wind.
