

Universal *Made of High Strength Plastic Compounds*  
**JAWS CLIP™**

With  
**Patent Pending  
Cam-Lock**

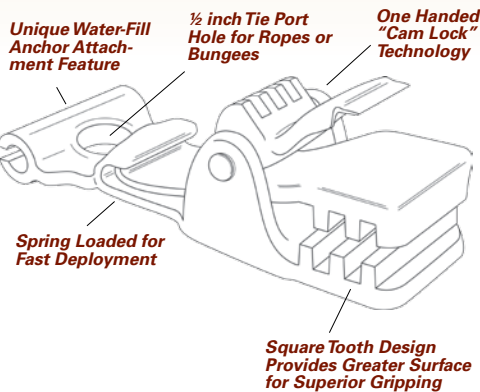

Patent Pending Square-Tooth design for  
**3X the GRIPPING Power**

**Universal JAWS Clip**

ClimaCover's patent pending JAWS clip features Cam-Lock Clamping and a unique, square tooth pattern that delivers 3X the holding power of other clips. Injection molded from our own high strength plastic compound and dead load tested.

Jaws clips are designed for one-handed installation to grip onto any grommet-less covering material ranging from visquene to canvas. Various covering materials will tear at different load levels. Pulling force performance tests have proven that most materials fail (tear out) before our clip fails.

Clips are injection-molded from "super-strength" formulated plastics and dead-load weight tested to ensure maximum gripping and holding. You can use the JAWS Clip™ with any tarp, visqueen, Canvas or flexible material. Typical tarp material will fail before the JAWS Clip will let go.

**Use to Secure - Residential & Commercial:**

- Tarps
- Sun Shades
- Rain Flies
- Shade Cloth
- Heavy Covers
- Visqueen
- Canvas
- Canopy Covers
- Most Grommeted or Non-Grommeted Flexible Material

Shown Above - One handed application of JAWS CLIP™ with Standard Rope or Cord Tie-Down.

Jaws Clip Shows Superior Gripping Power (shown here w/ visquene)

**Self-Merchandising Packaging**

4 - Pack Clam Shell for peg board display

ClipStrip 18 - count for impulse buyers

Bulk Box 70 - count with self-dispensing tray

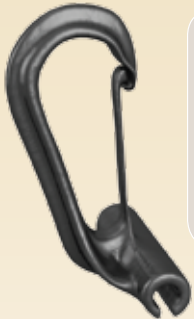

JAWS CLIP™ used with ClimaCover Water-Fill Tarp Anchor.

JAWS CLIP™ used with Bungee Cord or Standard Tie-Downs.

Spring Loaded  
**HOOK Clip**

**HOOK Clip:**  
Used here to attach Anchor to Grommeted ClimaCover Tarp.

**Spring Loaded Hook Clip**

ClimaCover™ Hook Clips are designed to attach to any kind of covering that has grommets. All of ClimaCover's Clips are injection molded from our proprietary, high-strength, plastic compound and are dead weight load tested and engineered to ensure maximum holding power.

Hook Clips may be adapted to a variety of uses. Sportsmen, Outdoorsmen, Campers, Hunters and Fishermen will find dozens of uses.

**The Spring Clip features:**

- Firm tension, gate-guarded lip to assure closure
- An open track to feed over kedered edges of coverings
- High-strength plastic compound for high performance
- Quality assured manufacturing and Customer Warranty

While these clips may be used with many different materials they are an integral part of the total ClimaCover Protective Systems. ClimaCover has a complete system for protecting valuable property.

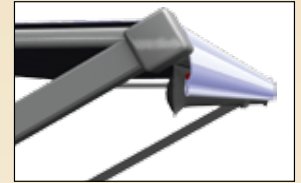

HOOK Clip shown here attaching ClimaCover Tarp Anchor and ClimaCover Grommeted Tarp.

RV AWNING Clip shown here attaching ClimaCover Awning Anchor to Standard RV Awning.

Channel Fit  
**RV Awning Clip**

**RV AWNING Clip:**  
Used here to attach Anchor to Channel on underside of Awning Channel main strut.

**RV Awning Clip**

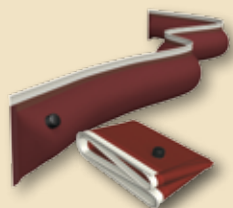

ClimaCover™ Awning Clips are designed to slide into the underside channel of Awnings. Most awnings for home protection and shade and virtually all RV Awnings feature such a channel. These clips slide to any position within the channel. Added weight may be attached to provide extra protection during high wind conditions. The hole in the center of the Awning Clip allow users to attach shade and insect protection drapes or hang lights for evening enjoyment.

**The ClimaCover RV Awning Clip Features:**

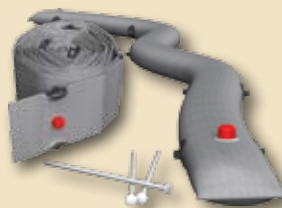

- A flange formed to slide into any awning channel
- An open track to feed over kedered edges of coverings
- High-strength plastic compound for high performance
- Quality assured manufacturing and Customer Warranty

**A revolutionary new system  
changing the way people think about Erosion Control,  
Water Diversion, Weather Protection & HazMat Control.**
